Inspired by faith and guided by wisdom, our children soar!

Mr. Daniel Bolster Science

Mr. Daniel Bolster has a background in environmental science with a bachelor's degree in environmental science systems from Le Moyne College in Syracuse, NY, and a master's degree in natural resources from the University of New Hampshire. His scientific work deals with streams and how they function, especially when it comes to the influences of land use and climate change. His undergraduate research looked at the effects of climate change on United States bird migration patterns.

On top of this, Mr. Bolster has also been a liturgical musician (organist, pianist, and vocalist) for 7 years, working or subbing in dozens of Catholic Churches in New York, New Hampshire, and Massachusetts, and playing at weddings and funerals all year long. Mr. Bolster is a gifted organist and does musical accompaniment at various area parishes.

2018 was Mr. Bolster's first year teaching at St. Joe's. Previously he taught intro biology and ecology labs for the University of New Hampshire and co-taught Faith Formation classes at his home parish, upstate New York. His hobbies include playing music, exploring nature, fixing cars, and spending time with friends.
